-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Silverbrook et al. (US 6439908).
3. Regarding claim 1, Silverbrook et al. disclose "providing the inkjet printer in at least first (12 of Fig 2) and second (14 of Fig 2) portions detachable from each other, the first portion requiring replacement more frequently than the second portion in use (col 2 ln 1-4); wherein the first portion includes the pagewidth printhead (18's of Fig 2 and Fig 8)."
4. Regarding claim 2, Silverbrook et al. disclose "wherein the first portion further includes a printing fluid storage for storing printing fluids to be delivered by the pagewidth printhead (30 of Fig 7)."
5. Regarding claim 3, Silverbrook et al. disclose "wherein the first portion (12 of Fig 2) is a printer cartridge removably received within said second portion (col 2 ln 51-53)."
6. Regarding claim 4, Silverbrook et al. disclose "wherein said second portion (14 of Fig 2) is a printer cradle unit having a cavity adapted to receive said printer cartridge (see Fig 5 in which the cradle unit is comprised of 14 and 64 and receives 12)."
7. Regarding claim 6, Silverbrook et al. disclose "wherein the printer cradle unit includes power and data connectors (56 of Fig 14) to mate with corresponding data and

Art Unit: 2861

power connectors (48 of Fig 8) provided on said printer cartridge to facilitate operational control of said printer cartridge (col 3 ln 59-64)."

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claims 5 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Silverbrook et al. in view of Waller et al. (US 6250738).

10. Regarding claim 5, Silverbrook et al. disclose the claimed invention as set forth above with respect to claim 4. Thus Silverbrook et al. meet the claimed invention except "wherein the printer cradle unit includes an electrical control unit."

11. Waller et al. teach providing "an electrical control unit (22 of Fig 1)." It would have been obvious to one of ordinary skill in the art at the time of the applicant's invention to provide an electrical control unit. One would have been motivated to so modify Silverbrook et al. for the benefit of maintaining control over the operation of the device internally and integrally as part of the cradle unit by receiving data to be printed, storing it in memory, and provide timing control, as set forth by Waller et al. in column 4, lines 51-59.

Art Unit: 2861

12. Regarding claim 7, Silverbrook et al. disclose the claimed invention as set forth above with respect to claim 6. Thus Silverbrook et al. meet the claimed invention except "wherein the printer cradle unit includes a print media handling system."

13. Waller et al. teach providing "a print media handling system (18 of Fig 1)." It would have been obvious to one of ordinary skill in the art at the time of the applicant's invention to include a print media handling system. One would have been motivated to so modify Silverbrook et al. for the benefit of providing the capability of moving the media sheet into the print zone, as stated by Waller et al. in column 4, lines 37-38.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian Goldberg whose telephone number is 571-272-2728. The examiner can normally be reached on Monday through Friday, 9AM-5PM.
